

Reusable Packaging Policy

Purpose

This policy outlines the guidelines for the use and management of reusable packaging at Norex, aimed at promoting sustainability, reducing waste, and enhancing customer convenience.

Scope

This policy applies to all customers and operations involved in the distribution and use of Norex products packaged in recycled G.I. barrels.

Policy Guidelines

1. Reusable Packaging Initiatives

- Norex encourages the use of recycled G.I. barrels for packaging their manufacturing products.
- Customers are invited to return empty barrels for reuse in future shipments.

2. Customer Responsibilities

- Customers must ensure that returned barrels are clean, free from contaminants, and in good condition for reuse.
- Customers should follow provided guidelines for cleaning and maintaining the barrels to ensure product safety.

3. Return Process

- Customers can return empty barrels to designated collection points or include them with their next order.
- Norex will provide incentives (e.g., discounts or credits) for the return of empty barrels.

4. Sustainability Commitment

- Norex is committed to reducing environmental impact by promoting a circular economy.
- We will continuously evaluate and improve our reusable packaging practices.

5. Training and Communication

- Norex will provide training and materials to educate customers about the benefits of reusable packaging and proper handling procedures.
- Clear communication will be maintained regarding any updates to the policy or processes.

Reusable Packaging Policy

6. Monitoring and Review

- This policy will be reviewed annually to assess its effectiveness and make necessary adjustments based on customer feedback and sustainability goals.

Conclusion

Norex is dedicated to fostering sustainable practices and enhancing stakeholders experience through our reusable packaging policy. By working together, we can contribute to a healthier planet while delivering high-quality products.
